Main Menu

Power ON/OFF

Power ON: Hold down the power button until the screen activates.
Power OFF: Press and hold the power key for more than 2 seconds, then select [Power off] to turn off the device.
Reboot: Press and hold the power key for more than 2 seconds, then select [Reboot] to restart the device.
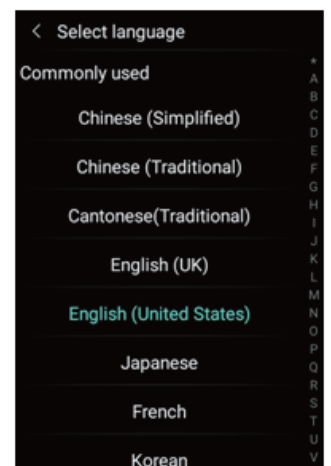

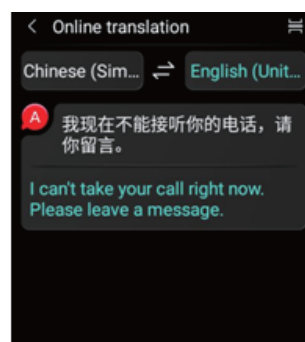

Main Menu

The main menu offers the following functionalities: online translation, offline translation, group translation, photo translation, smart recording, real-time translation, language learning, input translation, phone translation, exchange rate conversion, world clock, unit conversion, offline package management, and settings.

Online Translation

Connect to WiFi, select the [Online Translation] option, and click on the language to choose translations between multiple languages across different countries.
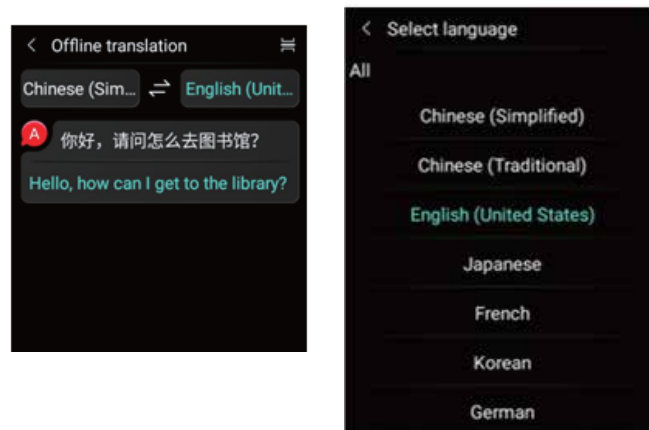

Notes:

1. This function requires a network connection.

2. Tap the speaker icon on the screen to replay the voice repeatedly.

3. The input key for the native language is on the left, while the input key for the foreign language is on the right.

4. The clearer the voice input, the more accurate the recognition will be.

Offline Translation

Offline translation is available in environments without a network connection.

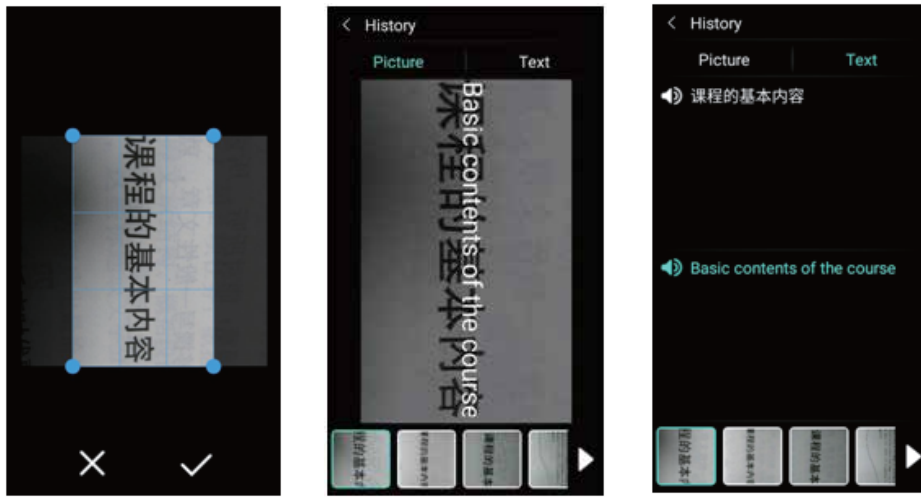

Notes:

1. This feature is operational even in environments without network connectivity.

2. Press the speaker icon on the screen to repeatedly listen to the audio output.

3. The input key for the native language is located on the left side, while the input key for the foreign language is on the right side.

4. The more distinct the voice input, the greater the accuracy of the recognition process.

Photo Translation

1. To use the photo translation feature, first click the photo translation icon.

2. Select the language you wish to translate to, and adjust the screen to align with the content you want translated.

3. Click the camera icon to capture the image and initiate translation.

4. After the translation is complete, press the speaker icon to hear the translation read aloud.
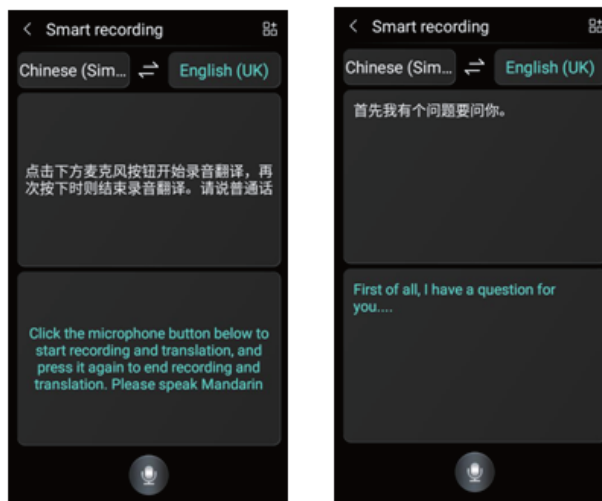

Note:

1. This function requires a network environment to operate.

2. The clarity of the photo captured using this function enhances the accuracy of the translation.

3. To delete the picture, press and hold the image in the lower left corner and select [Delete].

Smart Recording

Select the language to determine both the language you recorded and the language you translated to. Click the microphone button, and the text you are recording will simultaneously appear on the screen. Once the recording is complete, select [Save] to preserve the recording.

Note:

1. This function requires a network environment to operate.

2. Click on the button in the upper right corner to select the recording file. You can press and hold to delete it and free up space.

3. The clearer the voice input, the more accurate the translation will be.

Realtime Translation

This function allows for the conversion of spoken words into corresponding text, which is then translated in real time.

1. Select the language option to choose both your source language and the target translation language.

2. Press the translation button to begin speaking; press it again to end the translation once you have finished speaking.

**3.** The translation will automatically stop after one minute.

Group Translation

1. You can create a chat room using the other party's group ID number.

2. Within the chat room, click the icon in the upper right corner to access the language selection menu.

3. Select your preferred language for chatting.

**4.** Any text sent by the other party will automatically be translated into your selected language.

Note：

1. This function requires operation within a network environment.

**2.** The text sent by the other party can be broadcasted.

Phone Translation

1. When this function is activated, a QR code will be displayed.
2. You can scan this code using your mobile phone through applications such as Chrome, PayPal, and others.
3. This action will open the mobile phone translation page.
4. After you press and hold the phone's microphone to speak, the page will display the translated text in the selected language.

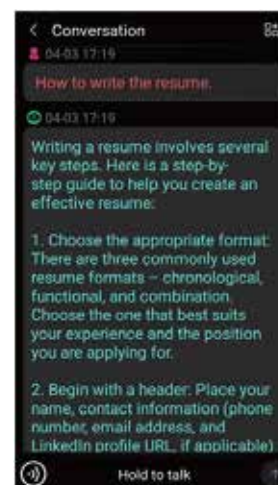

Offline Package Management

You can download offline language packs for translation use when a network connection is available. Currently, there are 54 languages supported.

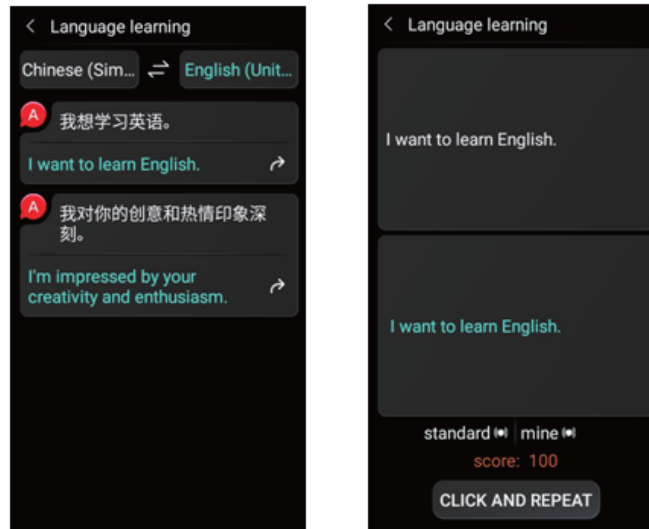

ChatGPT

ChatGPT is an artificial intelligence model developed by OpenAI, designed to provide users with information and answer basic questions.

Language Learning

This function allows you to follow the translated sentences to verify whether your pronunciation is fluent, complete, and accurate. It also integrates an overall score with the results to enhance your speaking skills effectively.

Important Notes

1. When the translator device is being charged, it is common for it to warm up.

2. The device is constructed from metal, plastic, and sensitive internal electronic components, making it susceptible to damage if dropped.

3. Please avoid exposing the device to high temperatures.

4. Take care to prevent the device from being punctured, compressed, or coming into contact with chemical substances.

Usage Environment

To ensure optimal functionality and longevity of the translator, avoid using it in environments where the temperature is excessively high or low. Additionally, limit prolonged exposure to direct sunlight, as this may trigger adverse reactions in the device. It is advisable to store both the translator and its power adapter in a well-ventilated area to prevent metal corrosion.

Specifications

Product Model	Levelo FluentLink Offline & Online Voice Translator
SKU	LVLFLVTGY
Battery Capacity	1500mAh
Recharge Time	2.5h
System	Android 7.1OS
Resolution	854×480
Dimensions	118×47×12.7mm
Weight	132g

Troubleshooting

The device fails to start.	1. Verify that the battery is fully charged and connect the charging cable to power up the device. 2. Press and hold the power button until the startup screen appears to ensure it powers on correctly.
The voice recognition feature is malfunctioning.	1. Press the button to hear a confirmation beep before speaking, then release the button after you finish. 2. Use clear and standard language when speaking. 3. Speak clearly and naturally, without unnecessary pauses or combining sentences.
The device is unable to establish a WiFi connection.	Ensure that you are connected to WiFi, and input the correct password.
The device does not charge completely.	Verify that the power source matches the device's requirements.

Warranty

Products procured directly from the **Levelo** website or physical store comes with a 24-month warranty. **Levelo** products purchased from any of our authorized dealers are guaranteed with a one-year warranty. If you wish to extend this warranty, you'll need to go to our website at **https://levelobrand.com/warranty** and fill out the necessary form, making sure to include your personal information and a photo of the product. After your request has been evaluated and accepted, we'll send you an email notification to affirm the extension of your product's warranty.
